

July 2020

### July NCyTE Member Webinar:

## How to Manage Insider Cybersecurity Threats: Non-malicious Insiders

**Friday, July 24**—Employees can present significant risk to their organization which is often overlooked and impacts both cyber and physical security. Those that knowingly violate security policy, but not for malicious purposes, may unwittingly participate in major data breaches. Carl Willis-Ford will present research-based and practical approaches for recognizing and managing the non-malicious insider to improve overall security postures at organizations.

### New NCyTE Video Series:

## Cyber Supply Chain Risk Management (CSCRM)

Malicious actors target vendors within supply chains inserting covert software and counterfeit components during system design and manufacturing. Explore these threats and approaches to mitigate risks in a video series presented by NCyTE Co PI, Philip Craiger, Associate Professor at Embry-Riddle University. This three-part series and more available at the NCyTE Center YouTube Channel and is intended for use by instructors and faculty to introduce these concepts to high school, community college and university students. Subscribe to the channel and catch new webinars as they are posted.

## Announcing: The New 2020 CAE Application Process

The Centers of Academic Excellence in Cyber Defense Education (CAE-CDE) program is undergoing an update of the application process. Beginning fall 2020, regionally accredited two-year, four-year, and graduate level institutions in the U.S. can apply for designation (or re-designation) under the new process. The CAE National Resource Center (CNRC) at Whatcom Community College has released a virtual Fast Track CAE Designation Workshop describing the updated submission timeline and new two-part application requirements. View the virtual workshop before completing the Applicant Checklist.
