Module 1 - Introduction to Networks

Last Updated 1/24/23

Module 

 Child of CyberSkills2Work - Intro to Networks (DSU-0012) ;

Description

This module covers the introduction to network fundamentals. Each module will consist (typically) of a set of PowerPoint slides and assessment questions pertaining to the module topic.

Critical Infrastructure

Last Updated 6/19/23

Course ☆☆☆☆☆

Parent of [Mod 1: Introduction to Critical Infrastructure](#) + 11 more

Description

Students will address basic security concepts as they apply to critical infrastructure systems. Concepts addressed in the course will include Industrial Control Systems (ICS), such as Supervisory Control and Data Acquisition (SCADA) systems, Process Control Systems (PCS), and Distributed Control Systems (DCS), national standards for the protection of critical infrastructure, and risk management concepts and tools for critical infrastructure systems. Students will perform a risk assessment of a specific critical infrastructure sector using an appropriate risk assessment framework and tools, identifying threats and vulnerabilities specific to the sector, and making appropriate recommendations for mitigating risk.

Researching Cybersecurity Careers

Last Updated 11/17/21

Micromodule

Description

Lesson plan designed by George Washington University for K-12 as part of the GenCyber program.

Researching cybersecurity careers is designed to engage the campers in research into one of 4 or 5 cybersecurity careers. This team guided research project is undertaken over the entirety of the camp and teams present their findings on the closing day of camp. The activity builds teamwork, research/evaluation skills and oral/visual presentation skills.

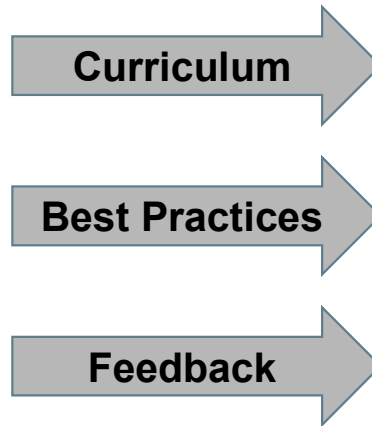

<https://clark.center/details/ssmith142/273d0e03-59ad-4478-88dc-8b6bbd3f04c2>

A decorative network diagram in the top-left corner, consisting of various sized circles (nodes) connected by thin lines (edges). Some nodes are solid grey, while others are hollow with a grey outline. The network is dense and irregular, extending from the left edge towards the center.

**Where does CLARK
get its content?**

A decorative network diagram in the bottom-right corner, similar in style to the one in the top-left. It features a cluster of nodes and connecting lines, with some nodes being solid grey and others hollow. The network is less dense than the one in the top-left, extending from the bottom-right towards the center.

A decorative network diagram in the top-left corner, consisting of various sized grey circles connected by thin grey lines, some with dashed outlines, forming a complex web-like structure.

How are submissions reviewed?

A decorative network diagram in the bottom-right corner, similar to the one in the top-left, featuring grey circles of different sizes connected by thin lines, some with dashed outlines, arranged in a more triangular or fan-like pattern.

Review Process of Curriculum to CLARK

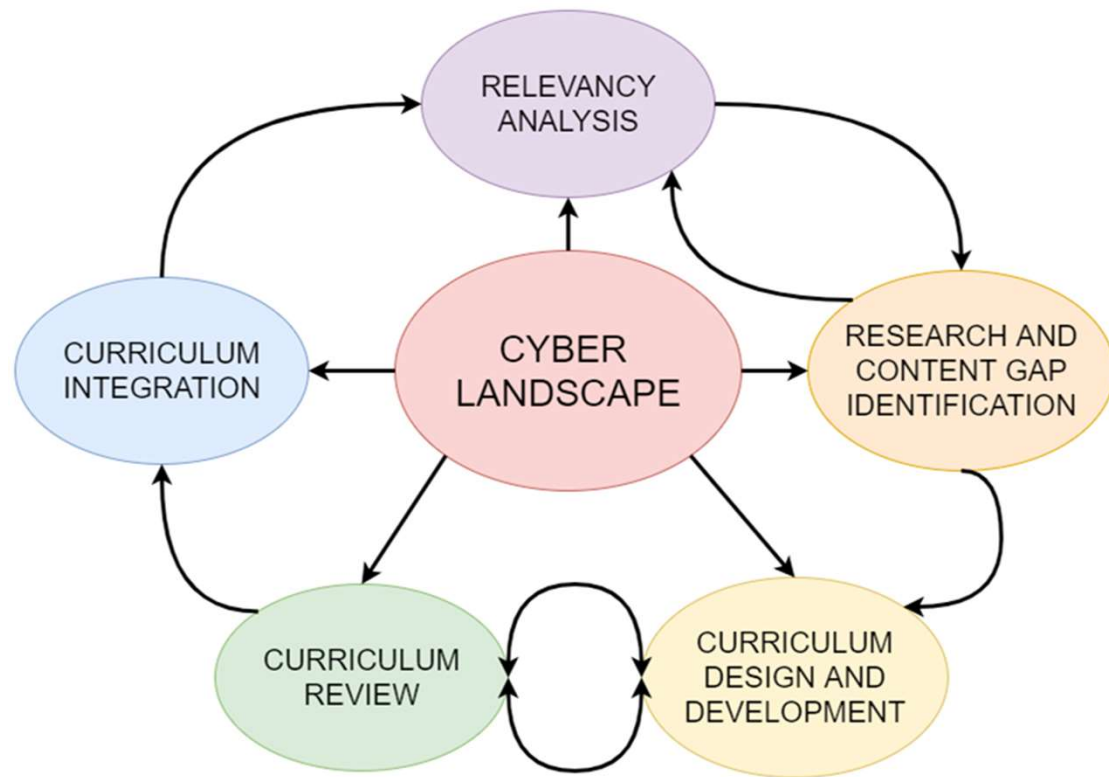

A decorative graphic on the left side of the slide, consisting of a network of interconnected nodes and lines. The nodes are represented by circles of varying sizes and colors (grey, white, and blue), connected by thin grey lines. The network is dense and extends from the top left towards the center.

How is material sustained?

CLARK Curriculum Sustainment Facets

Maintenance of open-source curriculum

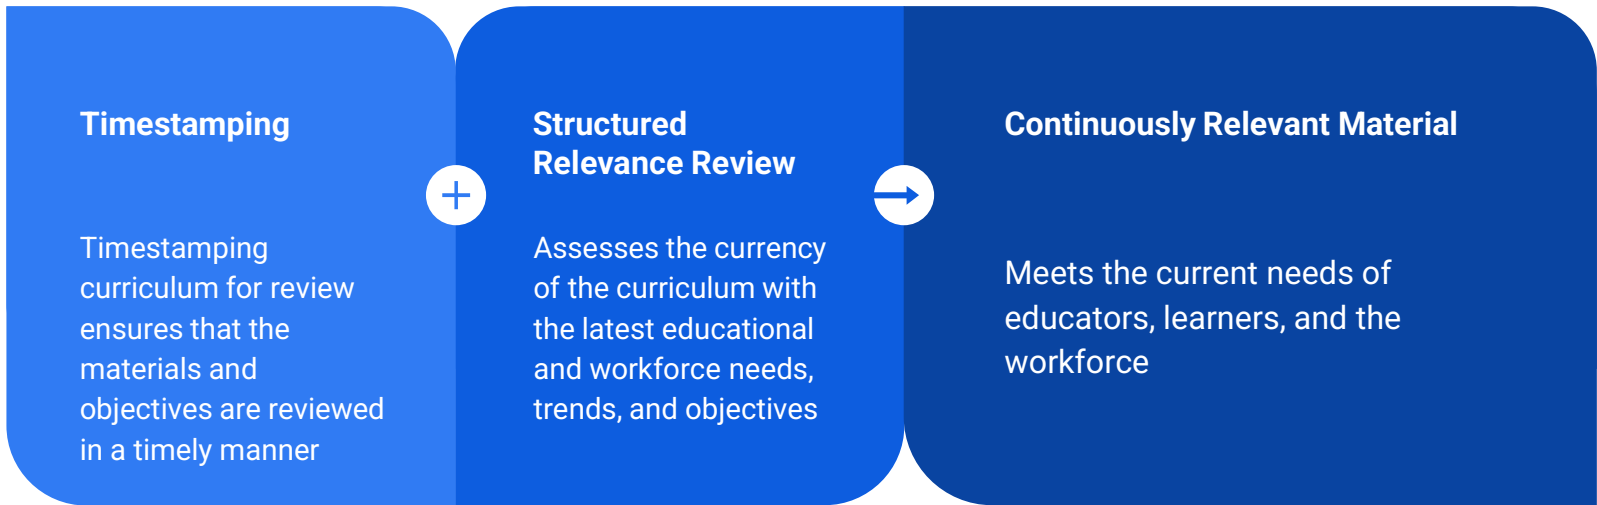

Classroom and Workforce Relevance

What does it mean for curriculum to be relevant?

- Does the topic align with the needs of the cyber landscape?
- Is it mapped to current KUs, guidelines, or standards?
- Is the pedagogy employed effective?
- Are the materials and/or tools usable in a classroom setting?
- Does it address real-world challenges and experiences?

How does CLARK maintain relevance?

A decorative network diagram in the top-left corner, consisting of various sized nodes (some solid, some hollow) connected by thin lines, forming a complex web structure.

How can I use CLARK?

A decorative network diagram in the bottom-right corner, similar to the one in the top-left, with nodes and connecting lines.
